Integrative Medicine at MD Anderson: Improving Treatment Outcomes and Achieving Optimal Health and Healing

What is integrative medicine?

Integrative Medicine is an approach to health care delivery that balances complementary health approaches and lifestyle medicine with conventional medicine in a deliberate manner that is personalized, evidence-informed, and safe. Complementary health approaches refer to natural products (e.g., dietary supplements, herbals), mind and body practices (e.g., meditation, yoga, massage, acupuncture) and other systems of care such as traditional Chinese medicine, Ayurvedic medicine, or naturopathy.

What is integrative oncology?

Integrative oncology is the application of integrative medicine to the care of cancer patients and their caregivers. Integrative oncology consultations are available in the inpatient and outpatient setting through the Integrative Medicine Center.

Integrative Medicine Center (IMC)

The IMC seeks to enhance the care of patients affected by cancer and their caregivers by providing and advancing comprehensive integrative treatment approaches through compassionate, evidence-informed clinical care, and research. We work collaboratively with oncology care teams with the goal of improving treatment outcomes and achieving optimal health and healing.

The integrative oncology consultation serves as the foundation for developing an integrative care plan that includes complementary health approaches and lifestyle changes. During the initial visit with the physician and Advanced Practice Provider, each patient is evaluated comprehensively and referrals are made to our other services according to the individual's physical, mind-body, or social needs. Our interdisciplinary team works together closely to optimize and adapt the integrative care plan to the changing landscape of an individual's cancer journey.

Integrative oncology combines conventional medicine, complementary therapies, and lifestyle approaches in a manner that is comprehensive, personalized, evidence-informed, and safe in order to achieve optimal health and healing.
